We realize that writing a letter or e-mail to your elected officials can seem like a daunting task, and writing a letter to the editor all the more so because it's such a public undertaking. But letter writing is an integral part of this campaign - They grab the attention of decision-makers.

To help make it easier, we've compiled a few tips below to help out if you choose to send a letter.

- 1. Keep it short. Letters between 200 and 400 words are a great length for the writer and the reader.** In the case of letters to the editor, short, pithy letters - sometimes just a single paragraph - are often the most effective, and have a greater chance of getting published.
- 2. Write about your feelings and from your experience.** Why do you think wilderness protection is important? It's much easier to write about what you think and feel.
- 3. As long as you're making the effort to write a letter, you might as well get as much mileage out of it as you can. Make sure to send it to ALL your elected officials and even consider sending it on the newspaper as a letter to the editor.** Don't forget to copy and save it before you send it through a website, so that you can keep reusing it!
- 4. Keep it positive.** This letter campaign is about the reasons we support protecting our wilderness. Negative letters only preach to the converted. Positive letters capture imaginations and get new people involved.
- 5. Include your name, hometown and phone number.**
